*This book is dedicated to all the hidden, unknown street artists producing colourful graffiti across Barcelona. It is a brief digital exploration of their art, collaged to form new designs. Later images use AI to re-imagine their graffiti as collages and graffiti laden sculptures.*

*"Graffiti is one of the few tools you have if you have almost nothing. And even if you don't come up with a picture to cure world poverty, at least you can make someone smile while they're stuck in traffic." - Banksy*
